

# Build What Matters. Your Future in Tech Starts Now.

## Axon High School Internship Program

At Axon, high school interns don't just sit on the sidelines, you go hands-on. You'll build, create, and work on real technology that helps keep communities safe and saves lives.

This paid, in-person internship gives you the chance to learn directly from industry pros, gain real-world experience, and see what it's actually like to work at a fast-moving tech company with a powerful mission.

### What You'll Do

As an Axon High School Intern, you may:

- Research and solve real problems through exploring emerging ideas in public safety technology and working alongside engineers and product teams to design, prototype, and improve innovative tech solutions.
- Grow career skills through mentorship, attend career-focused development sessions, and presenting work to leaders at the end of the program.
- Drive innovative ways of working by identifying workflow gaps, recommend process improvements, and explore how AI tools can streamline team efficiency and problem-solving.

**This isn't a classroom, it's the real world.**

### Who Should Apply

You're a great fit if you're:

- A current high school junior or senior
- Curious, motivated, and excited about technology
- Interested in making an impact beyond the classroom
- Ready to learn, ask questions, and try new things

**No prior tech experience required, just curiosity & grit.**
